- Racing-mode:** short-track: Every team starts 4 times - these are setup of 2 pre-races, 1  
qualification race and a final race. The better of the 2 pre-race times decide on  
the Cup the team will be counted on. The same pre-race time will be added to  
the qualification time (3rd race) and used to decide on the actual starting slot in  
the final race (highest/fastest final: A). The finals finally count for the overall  
placement. The starting order for both pre-races are randomly chosen, but for  
qualification and final race the time from previous races decide.  
*long-track: The 1.000 meters pursuit race starts after the A-finals (after all short-  
track races). Each team starts once. The fastest team wins. That race is limited to  
20 teams currently and may be increased to max. 30 teams on demand.*
