- Racing-mode:** short-track: Every team starts 4 times - these are setup of 2 pre-races, 1
qualification race and a final race. The better of the 2 pre-race times decide on
the Cup the team will be counted on. The same pre-race time will be added to
the qualification time (3rd race) and used to decide on the actual starting slot in
the final race (highest/fastest final: A). The finals finally count for the overall
placement. The starting order for both pre-races are randomly chosen, but for
qualification and final race the time from previous races decide.
*long-track: The 1.000 meters pursuit race starts after the A-finals (after all short-
track races). Each team starts once. The fastest team wins. That race is limited to
24 teams currently and may be increased on demand.*
- Motivation:** It's not just about honor! We do have really great trophies for the best teams of
